

TDTokens Privacy Policy

General

TDTokens, including web site and apps, does not collect any user information. No information is collected via the web site, and no cookies are utilized by the web site. No personal information is transmitted by our apps to us or anyone else. It is our policy to protect your privacy as much as possible. Please be aware that our apps utilize stock libraries provided by Apple for IOS and Google for Android. To the best of our knowledge, none of the libraries in use by our apps collect personal information.

Apps with Email File Transfer

Some of our apps do perform file transfer via email. In the transfer, an email is created and presented to the user's email app. None of our apps will independently send emails of any kind. The apps only generate the email structure for the user. If the user decides not to send the email, no information is transferred. If the user elects to send the email, the information is only sent to those designated by the user. Nothing is sent to TDTokens.

Apps with Bluetooth Transfer

Some of our apps allow the user to transmit character information between devices via Bluetooth. In this case, the user name is broadcast over Bluetooth for the purposes of connecting between devices. No passwords or other user information is utilized, and after the transfer views are exited, no user information is retained, although the game character information is retained as normal. Again, none of this information is sent to TDTokens.

Apps utilizing Cloud Storage

Some of our apps allow the user to retain a copy of game data on a Cloud drive. At present, this feature is only available on IOS apps, and the option for storing on a Cloud drive is the built in Apple Cloud Drive as set up in Settings on the device. Storage on that Cloud service requires the access of the user ID to store and retrieve the data from the cloud. The user ID is not stored by the app, as it is accessed only when cloud access is requested. When requested the user ID is acquired from the operating system, and otherwise not stored. Transmission of this information is only to the Cloud Storage system. At no time does the app request or given any passwords. Those are retained by the operating system. The only data collected from the Cloud Storage is the game data specific to the app. No other information is collected during the process, and no data is sent to TDTokens at any time.

If you have any questions or concerns about our policy, please contact us via Customer Support on our website tdtokens.com.
